

## How the Interagency Ecological Program uses data to inform management decisions

This will be the first in a series of three brown bag seminars, and will be happening June 26, from 12 p.m. to 1:00 p.m. This seminar will be led by Vanessa Tobias, Ph.D., a senior environmental scientist with the California Department of Fish and Wildlife, and will discuss the principles of open science, the benefits of using open data practices in a collaborative research and monitoring program, and the tools used to mitigate potential risks. Click [here](#) for more information.

## California Water Commission meeting

The California Water Commission will be meeting from June 27 to 29, beginning at 8:30 a.m. Click [here](#) for more information, including the agenda.

## Delta Stewardship Council meeting will be held June 28

The next Delta Stewardship Council meeting will be held on June 28. Click [here](#) for more information. Also, the Data to Decision-Making Summer Series continues at this council meeting. A panel discussion, as part of the series, will take place at each of the Delta Council meetings through August. For more information, click [here](#).

## New date and time for Delta Conservancy July board meeting

The new information for the July Delta Conservancy board meeting is Monday, July 30, from 1:00 p.m. to 5:00 p.m., at the [Delta Conservancy](#) office in West Sacramento. Among other things, the Proposition 1 grant guidelines will be considered, and if approved, open the 4th grant solicitation the next day, August 1.

## Estuary News publishes June issue

The June issue of Estuary News features 11 stories about the 2017–2018 Resilient by Design Bay Area Challenge, and how nine places around the Bay Area might be better designed to adapt to a rising Bay and increased flooding, while simultaneously overcoming the threat of displacement and gentrification for shoreline communities. The issue also delves into regional governance needs, explores an innovative levee setback and climate planning in the Delta, updates Bay sediment supply estimates, reports on new integration teams for fast tracking permitting for Measure AA-funded projects, and more. View this issue [here](#).

## CDFW accepting proposals for restoration projects that provide greenhouse gas benefits

The California Department of Fish and Wildlife (CDFW) is now accepting proposals for wetland restoration projects to provide greenhouse gas benefits under its Wetlands Restoration for Greenhouse Gas Reduction Program. For Fiscal Year (FY) 2017–18, \$12.75 million is available from the Greenhouse Gas Reduction Fund for projects. For more information, click [here](#).
