

Len Cardoza

Len Cardoza is a Senior Technical Advisor and Project Manager for Weston Solutions. He has over 35 years experience in funding, planning, conducting and supervising various aspects of maritime redevelopment, environmental restoration, port operations and dredge material management in Europe and throughout the US. He specializes in providing leadership and technical expertise in program and project planning and delivery within constrained schedules and budgets. In his 20 years with the USACE, Len served as Commander and District Engineer at San Francisco District and Deputy District Engineer at Sacramento District. He also directed navigation and dredging programs for the Port of Oakland for 12 years including berth and federal channel maintenance and completion of the -42 and -50 foot navigation improvement projects. Len is a Board Certified Environmental Professional. He has also been involved in the Long Term Management Strategy (LTMS) for dredging and beneficial reuse and disposal of dredged materials in the San Francisco Bay Area, including LTMS short- and long-term work groups. Mr. Cardoza is the Chair of the Confounding Factors Work Group for LTMS, and chairs the Environmental Committee of the California Marine Affairs and Navigation Conference. He holds a Bachelor of Science Degree in Biology from the University of Santa Clara and a Master of Science Degree in Administration with area of concentration in Wastewater Management from Central Michigan University. Len's passion, after family and work, is recreational sailing.
