# Weather Information

Source: Cal OES Daily Situation Report - [September 6, 2018](#)

*RH = Relative Humidity*

## NORTHERN CALIFORNIA

- Gusty afternoon W winds and low relative humidity (RH) Friday east slopes of Coast Range into far Western Sacramento Valley
- Gusty, mostly SW wind with RH early next week near and E of the Cascade/Sierra crest
- Low pressure trough offshore will have most influence over the North Ops region for the next 7 days, no thunderstorms or precipitation expected
- Gusty afternoon W winds/low RH developing Friday east slopes of Coast Range into far Western Sacramento Valley, gusts mostly 15-25 mph, locally to around 30 mph.
- Winds otherwise will be lighter today most areas with not much change Friday
- Weekend-onward winds include daily gusty, W to NW winds ocean to Coast Range crest and gusty, mostly SW wind/low RH expected early next week near/E of Cascade Sierra crest
- Even without wind, low afternoon RH/poor to moderate overnight RH recovery at least through the weekend will be fairly wide spread with areas of overnight thermal belt conditions developing mid and upper slopes
- Temperatures somewhat above seasonal values inland next few days, warmest locations mid and upper 90s, followed by cooling next week to more seasonable values in the lower 90s warmest inland places

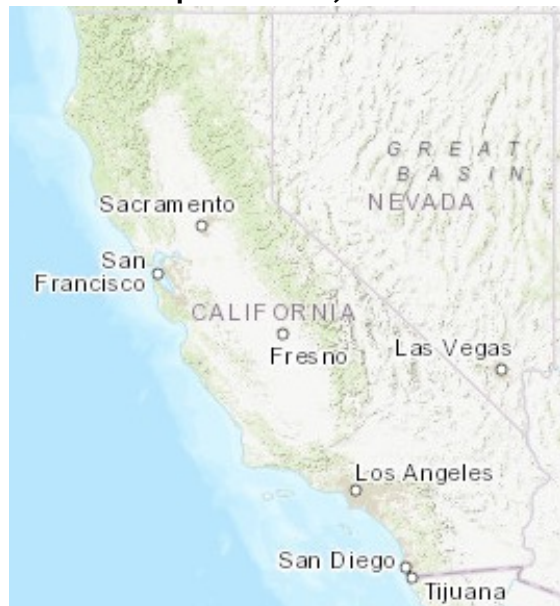

## SOUTHERN CALIFORNIA

- High pressure over the Pacific will expand eastward, resulting in much warmer weather the next few days. Breezy conditions will develop each afternoon along the central coast which will transition into nighttime sundowner winds across Santa Barbara County and north winds along the I- 5 Corridor. Cooler, onshore flow is expected to return for the balance of next week.
- Maximum temperatures today will reach the upper 70s to lower 80s in the mountains to the lower 90s in the valleys, warming another 3-5 degree Friday. Saturday will be the hottest day with highs of 100-103 in the valleys. Slow cooling trend Sunday and Monday before temperatures fall to below normal next Wednesday.
- Northwest winds of 15-25 mph each afternoon along the central coast through Sunday. Local north winds of 10-20 mph tonight in Santa Barbara County and the I-5 Corridor. North winds increasing to 15-25 with gusts to 40 mph in these areas Friday night/Saturday morning.
- Minimum humidity will be mainly between 15%-25% above and inland from the marine layer today. Look for RH minimums to drop into the 8- 12% over most areas below 7,000 feet over the weekend. The lowest readings may occur along the central coast interior over the weekend. Only fair recovery across mid slope elevations with thermal belts forming due to clear skies overnight.
- Possibly turning windy in the Sierra high country into the western Owens Valley during the latter half of next week.

Fire Information Line: 530-493-1524 7:00am-8:00pm or [2018.NatchezFire@firenet.gov](mailto:2018.NatchezFire@firenet.gov)

## Projected Fire Activity

South end of the fire continues to make uphill runs with short range spotting. Fire continued surface spread progressing west up Copper and South Fork Indian Creek Canyons approaching Cyclone and Raspberry Gaps in Lieutenant Ridge. (1)

**24hrs:** Breezy ridgetop conditions and low relative humidity will provide active burning conditions. Active surface spread with intermittent torching and short range spotting. Expect gap between main fire in Copper Creek Canyon and Cyclone Gap to decrease to within a half mile. (1)

**48hrs:** Active surface spread with intermittent torching and short range spotting. Continued growth to the south and west. Expect main fire in Copper Creek Canyon and that Cyclone Gap to meet. (1)

**72 hrs:** Active surface spread with intermittent torching and short range spotting. Expect continued progress up South Fork Indian Creek toward Raspberry Gap. Continued growth to the south, consuming gaps left between 2017 Eclipse burn and Natchez Fire. (1)

**72+ hrs:** Moderating fire activity by mid week expected, with cooling and moistening airmass. Moderate fire activity in upper elevations, and active fire activity in richer lower elevation fuels. Continued growth to the south, consuming gaps left between 2017 Eclipse burn and Natchez Fire. (1)

## Projected Fire Activity

Fire activity increased in the afternoon with some short range spotting outside the line. (1)

Fire may continue to make slope runs to the north and east. Roll out is of concern to the northeast and southeast. Short-range spotting possible. (1)

In the next 24 hours the fire's perimeter will be tested, particularly in the northeast corner near Black Mountain. Fire managers are feeling confident that if the fire does not grow during the next 24 hours, the forward spread of the fire will be stopped. (4)

## Projected Fire Activity

Extreme fire behavior with running and spotting. (5)

The fire had several sustained crown runs with spotting of up to .75 miles and continued to burn actively during the burn period. Fire burned to the north and northwest. (1)

Fire will be moderate until the inversion breaks in the early afternoon. Fire activity will increase as a dry cold front approaches from the northwest with increased southwest winds with gusts 15-20 during the day, then turning west northwest 15-25 mph by midnight after the front passes. (1)

# Donnell Fire - Tuolumne & Alpine Counties

Sources reference number (#) corresponds to number in the information sources at the end of the section.

Acres Burned [Change]	% Contained [Change]
36,400 (1) [+65]	87% (1) [+22%]

Start Date	Estimated Containment Date
August 1, 2018 (1)	October 31, 2018 (1,3)

Lead Agency(ies)
Stanislaus National Forest (1)

Initial Location
Donnell Lake (1)

Structures Threatened	Structures Destroyed
None (1,2)	54 structures, 81 minor structures (1,2,3)

Other Infrastructure Threats
None listed

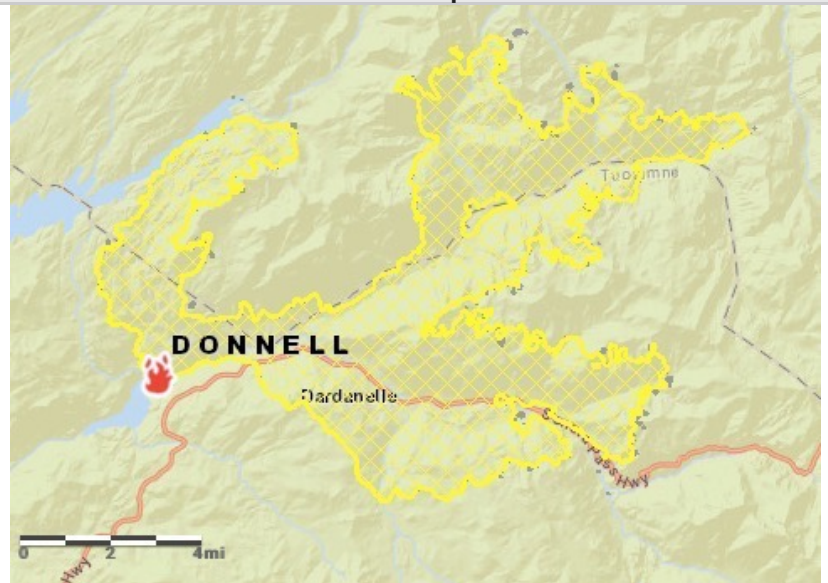

Cause of the Fire
Unknown (1)

Proclamations
08/05/18, a Proclamation was received from Tuolumne County due to the Donnell Fire. (4)
08/08/18, a Local Health Emergency Proclamation was received due to impacts from the Donnell Fire. (4)

Hashtags

## Fire Maps

Source: [National Interagency Fire Center \(Sept 6, 2018\)](#)

Impacted Zip Codes: 95223, 95314

Nearby Zip Codes: 95364

Fire Information Line: 209-432-3157

Fire Information Email: [donnellfirestf1918@gmail.com](mailto:donnellfirestf1918@gmail.com)

Fire Maps: <https://inciweb.nwcg.gov/incident/maps/6092/>

## Projected Fire Activity

Fire activity has been minimal over the last several days. Overall fire growth has been 150 acres since Sunday. Expect fire to continue to spread in areas where continuous fine fuels are located and pockets of heavy dead and down exist as receptive fuel beds. (1)

Potential exists for minimal spread to the north and east along Highlands Creek, Arnot Creek, and Disaster Creek drainage via spotting. Minimal fire spread, but spotting will remain a concern. (1)

### Download Instructions

Guide #	Instructions
A	<ol style="list-style-type: none"> <li>1) click on the three dots in the red header bar for the more options dropdown menu</li> <li>2) select "Download KML"</li> <li>3) Select whether you want a KML or KZM File</li> </ol>
B	Step 1 under Instructions for Google Earth has the "click here" download link
C	Select the desired map file type and select the desired time period under "USA (Conterminous) and Hawaii"
D	Scroll to the bottom of the page and select the desired file format under downloads.

### Guide for Overlaying Zip Code Data in Google Earth

After opening KML or KZM file in Google Earth activate the Postal Code Boundary layer to see the zip codes. Postal Code Boundary layer is located in Google Earth under Layers -> More -> US Government -> Postal Code Boundary. Tip: to make it easier to see the zip code boundaries, turn off the roads layer.
