

Featured Member - Manson Construction

Founded in 1905, Manson Construction Co. started as a small pile-driving business that supported the early development of Seattle's waterfront in Washington State.

Today, Manson is one of the nation's premier marine contractors with a rich legacy of providing quality marine services throughout North America's waterways, including the Bay Area.

Manson provides innovative solutions and engineering expertise, bringing a unique approach to in-water and over-water projects. Our services include heavy civil waterfront construction, open-ocean dredging, beach nourishment, subsea cable installation, offshore energy, and more. The company's philosophy is simple; focus on innovation, provide solutions to challenges and engage the client throughout a project's lifespan. Manson has performed a variety of specialized projects, focusing on three areas: engineering, environment, and safety to meet timely and cost-effective project completion. With offices in five strategic locations: Seattle, WA; Richmond, CA; Long Beach, CA; Houma, LA; and Jacksonville, FL, Manson's experience in marine construction and dredging allows the execution of quality work beyond client expectations.
